HIGHER EDUCATION SOLUTION BRIEF
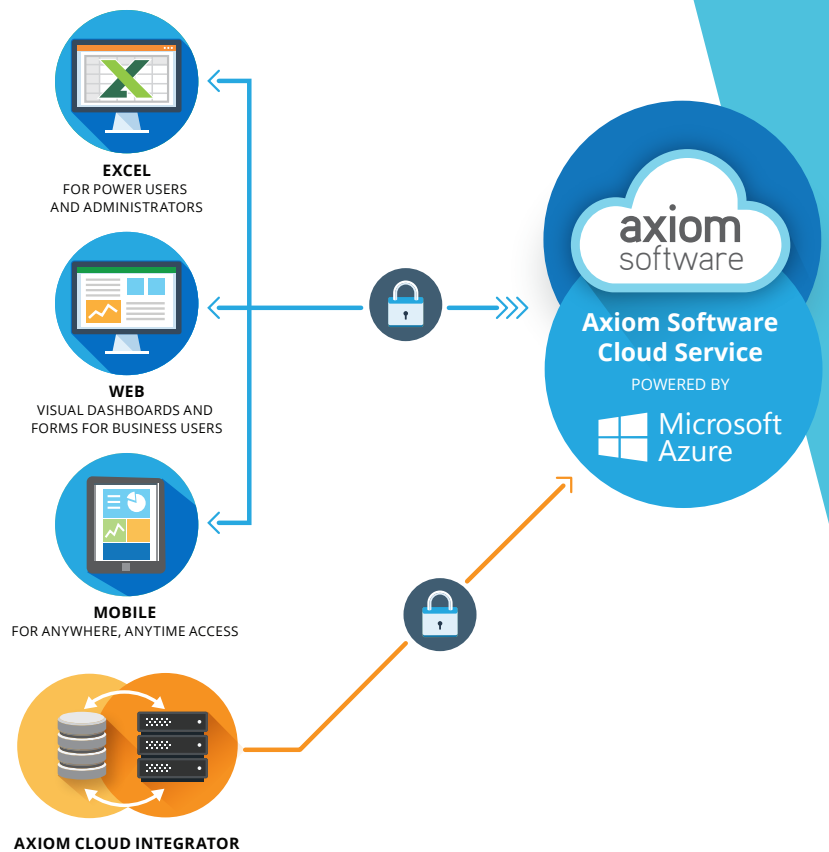

Axiom Software Cloud Service

Secure, Efficient, Platform in the Cloud

The Axiom Software platform is available in a cloud environment that enables you to reduce IT overhead while receiving optimal system performance and unmatched security. Axiom Software provides and maintains all necessary platform infrastructure and performs all technical maintenance activities. Customers connect to their own, personalized Axiom Software system via a secured Internet connection, hosted in dynamically scalable, secure and geo-distributed Microsoft Azure datacenters.

Unlike many cloud offerings, the Axiom Software Cloud solution is a truly unified performance management platform that delivers solutions for budgeting and forecasting, long-range planning, enrollment, student aid and grant planning, capital planning, and cost management all on a single integrated platform. Customers can take advantage of the benefits of cloud computing without sacrificing the need for unmatched modeling flexibility, enterprise performance and security.

Business benefits of enterprise performance management in the cloud:

- *Privacy and Compliance.* The Axiom Software Cloud Service employs a framework of security and risk protocols that enable our customers to meet a number of their industry-specific regulatory requirements. Enterprise organizations require solutions that can meet their strict requirements for security of their confidential financial and operational data. As further evidence of Kaufman Hall's commitment to delivering a secure, enterprise-grade solution,

Cloud Service**
POWERED BY

Microsoft
Azure

> " *For us, it was a no brainer to choose the cloud. We felt comfortable and confident that it was absolutely the right direction to go.* "
>
> **- Steve Lisa, Manager, ERP Operations, Tufts University**

www.kaufmanhall.com/axiomcloud

the company announced an ongoing engagement with BDO USA, LLP to provide SSAE-16 SOC Type II (SOC2) audits of operational controls. Kaufman Hall maintains compliance with SOC2 controls, protecting customers' sensitive data, whether it's stored on premises or in the cloud. The Microsoft Azure infrastructure addresses a wide range of international, country, and industry-specific regulatory requirements, by meeting the certification requirements.

- **Powerful Automated Data Integration.** Easy to use interface lets you select an integration option based on the frequency of your data needs. Built-in ETL and our commitment to open integration standards gives you the power and flexibility to connect to virtually any data source to leverage clean, trusted data for performance management decision making.

- **Rapid Deployment.** Administration-free deployments and upgrades keep your versions up to date with minimal hassle. Initial integration is seamless with the easy to use Axiom Data Import Wizard. Connect and integrate data from any GL, ERP, CRM, HR or data warehouse system or import directly via Excel or CSV files. Onboarding support is also available, with our team of industry-leading experts ready to assist and tailor solutions to your needs. Our data integration team has experience with core systems commonly used in higher education such as Oracle/Peoplesoft, Ellucian Banner, Ellucian Colleague, and Workday."

- **Industry Leading Security.** The Axiom Software platform is fully equipped with enterprise grade user-based security enabling you to have complete control over how your performance management data is accessed and shared within the organization.

- **HIPAA Compliance Framework.** The Axiom Software Cloud Serviceleverages Microsoft's Azure HIPAA Compliance framework and includes a BAA Contract Addendum from Microsoft, and is designed to be HIPAA compliant within an organization's compliance guidelines. Customers using the Axiom solution for PHI data should be aware of their HIPAA policies and manage the Axiom solution according to those internal policies. ■
